

# Functional Changes 12/8/19

# 1. Home Page

1.1 Change text to “Reorder replacement lenses using a barcode scanner”

1.2 Change text to “Simple ordering using dropdown menus”

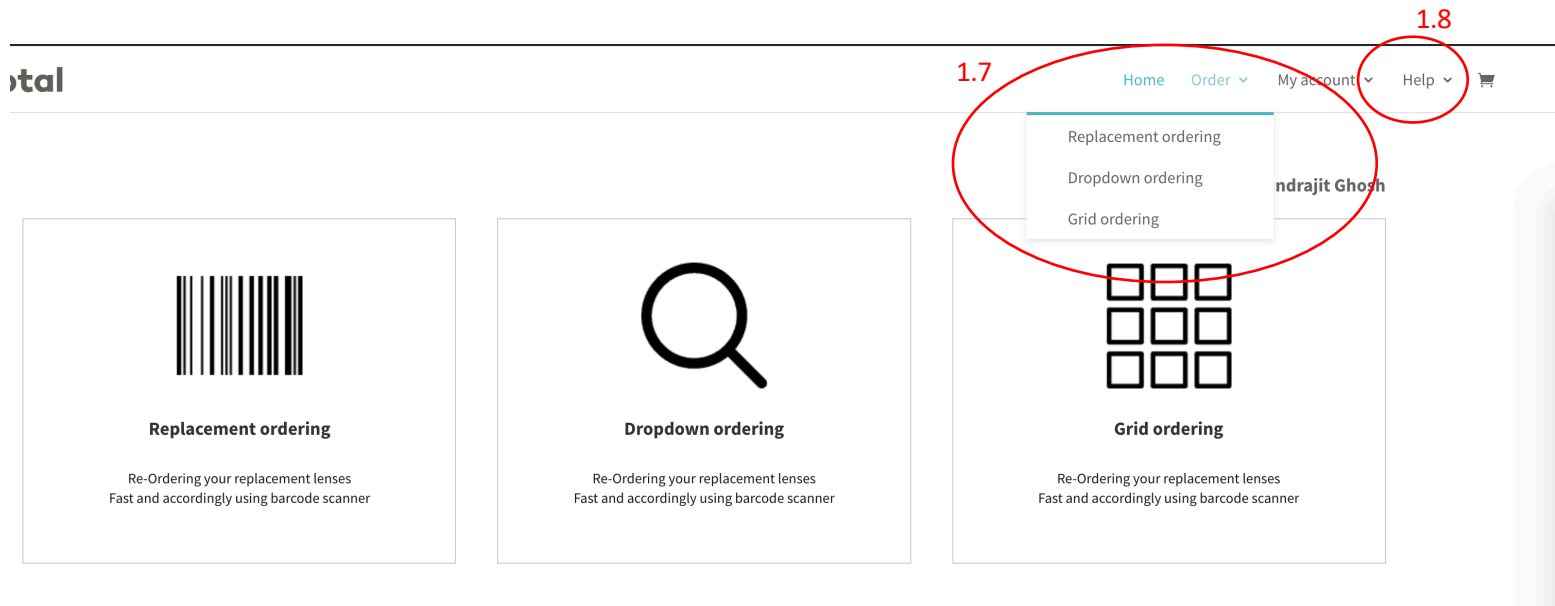

1.3 Change text to “Fast grid ordering for initial or large bulk orders”

1.4 Some sort of flag indicator that indicates there are items in the cart. Match our orange color (#FF7434)

1.5 Remove social media links, decrease thickness of black border accordingly to fill in blank space

1.6 Clicking email should bring up NEW popup window, (not direct customer off page)

# 1. Home Page Cont – (dropdowns)

1.7 Dropdowns under “Order” do not seem to be aligned properly to expand dropdown correctly. Please make the dropdowns more user friendly.

1.8 Under “help” dropdown, “email support” should pop up new browser instead of taking customer off website.

## 2. Grid Ordering

**Note : Grid ordering is done by pairs. Placing 1 in space will result in 1 pair (2 lenses)**

2.1 Loading time – taking too long when lenses are added to cart.

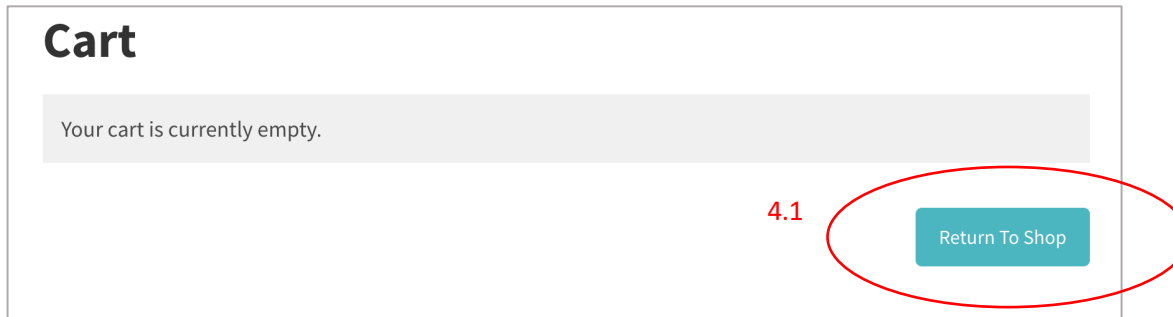

2.2 Grid should clear after lenses are added to cart

2.3 Message should appear “Lenses were added to the cart” , which displays when using the other methods

2.4 Remove line

2.5 Make headers same thickness, & confirm text in both horizontal and vertical header are same size

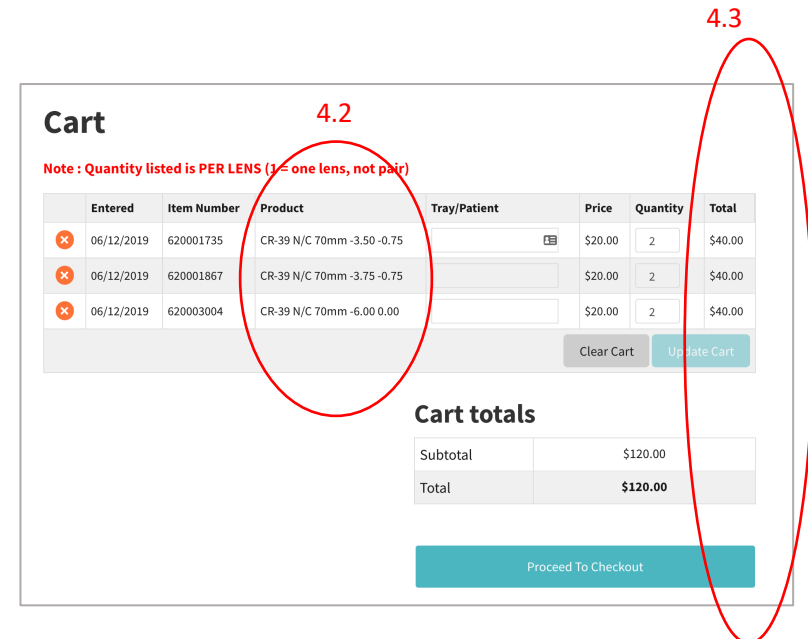

## 4. Cart

4.1 When no items in the cart, this button should say HOME, and direct customer to home page instead of product page. We was to remove any/all links to these product pages

4.2. Please make “product” column about 50% longer, to accommodate longer product names. I want to avoid descriptions being displayed on 2 rows.

4.3 Please make sure keep tables right aligned after making change above.
